

TECHNYL® A 216 Y10

Product Datasheet - June 2007

Description

Unreinforced polyamide 66, containing molybdenum disulfide, medium viscosity, heat stabilized, self lubricating, for injection moulding.

Product Applications

TECHNYL® A 216 Y10 offers all of the primary properties of unreinforced polyamide 66 and mainly has, excellent surface properties:

- low coefficient of friction
- good resistance to wear

This grade is particularly suitable for moulding of mechanical self lubricating parts, such as : gears, bearings, hub bushes.

This product is available in natural (dark grey).

Processing

The material is supplied in airtight bags, ready for use. In the case that the virgin material has absorbed moisture, it must be dried to a final moisture content of less than 0,2% with a dehumidified air drying equipment at approx 80°C.

Recommended moulding conditions:

Barrel temperatures:

- feed zone 250 - 270°C
- compression zone 260 - 270°C
- front zone 270 - 280°C

Mould temperatures: 60 at 80°C

For more detailed information , please refer to the technical sheet Injection moulding.

Safety

Please refer to the Safety Data Sheet CUQAJDCH8FS

TECHNYL® A 216 Y10

The values of properties are for natural grade.
